Administrative Advisory

PRODUCT UPDATE Series HY Couplings *Cosmetic Change*

Effective February 2012, there is a change to the appearance of HY couplings. This is a cosmetic change only; there are no changes to performance ratings, part numbers (HY couplings offered by IHP feature an "S" prefix, such as S101HY-6-6) or the crimp specs for IHP hoses. As a reminder, current crimp specs for IHP hoses are located at www.safehose.com.

While this is only a cosmetic change for IHP, there are some crimp dimension changes that will occur when the fitting is used with select product from the Parflex Division. Consequently, all cartons containing the new fitting will be marked with a bright yellow label with the message below. If you are using Parflex hose and require more information regarding the changes for PFD, please contact your field sales representative or a Parflex Product Sales Manager.
