PRODUCT UPDATE

Series 7219 MP, 7395 GS and 7399 HT E-Z Form™ Hose *Branding, Crimp Spec and Price Updates*

Parker recently introduced small bore sizes of Series 7219, 7395 and 7399 E-Z Form Hose manufactured in the USA; the country of origin is identified at the end of the brand/layline. These domestically produced items are available in 25-ft factory-cut lengths as well as nominal 300-ft reels.

Parker is sharing manufacturing efficiencies incorporated with domestically produced product. Effective immediately, Parker is introducing 300-ft reel part numbers at 5% below current list prices for corresponding 25-ft part numbers. Contact Parker for specific pricing information.

Crimp specs are now established for these American-made hoses for both adjustable crimpers and Parkrimp crimpers. A quick-reference guide to these products appears on page 2 of this Product Advisory. For crimp specs for these sizes of hoses manufactured in Italy (see brand/layline of the hose), contact Parker.

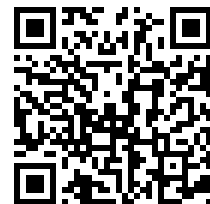

Finally, hoses larger than 1" ID will also include the size on the brand/layline. This change will be implemented with the next production run of each size.

Please refer to the table on page 2.
