## NEW PRODUCT

### Composite Hose TTMA Coupling *New Aluminum Dry Seal Design*

Large bore composite hose assemblies are frequently used for high volume bulk transfer of petroleum products on loading/unloading platforms in depots and terminals. Parker now offers a lightweight, one-piece aluminum Tank Truck Manufacturers Association (TTMA) flanged coupling for these applications. This aluminum coupling:

- Reduces end weight by as much as 70% versus comparable carbon steel couplings, providing easier handling and faster installation
- Incorporates the unique Parker one-piece design, eliminating welded joints/seams and their inherent potential leak points
- Incorporates the Parker Dry Seal attachment system, providing quick assembly fabrication and minimal downtime
- Provides great value for a more cost-effective solution in traditional TTMA applications

Parker currently offers a variety of aluminum, carbon steel and stainless steel composite hose couplings in popular sizes and end styles. The aluminum TTMA flange coupling is a great addition to the Parker Dry Seal composite hose assembly system.

Composite hose and couplings are sold in bulk only to Parker Select Composite Assembly Fabricators. For the nearest Composite Hose SCAF, visit [www.safehose.com](http://www.safehose.com) and click "Find a Specialty Distributor."

Part Number	Hose ID (in)	Description	Approx Wt (lbs/ea)	Std Pack Qty (ea)	Stock Status*
01DF-TTMA-64-64D	4	TTMA Flange (6.63" flange OD)** Aluminum	2.32	2	Y
01DF-TTMA-64-64	4	TTMA Flange (6.63" flange OD)** Carbon Steel	8.00	2	Y
** Fits through crimper head of COS-K4 crimper.					

\* **Stock:** "Y" indicates stocked item; "N" indicates non-stocked item. Stock status subject to change. Contact Parker Customer Service.
