APPLICATION UPDATE

HoseFinder 3.5 Mobile Device App *Updated to Include Industrial Hose Products*

Parker's HoseFinder mobile device application now includes industrial hose products!

HoseFinder has established itself in the marketplace as the premier mobile application for hydraulic hose, and now includes information regarding Parker's equally premier industrial hose product offering.

HoseFinder is like having a Parker catalog in your pocket. Some of the industrial hose functionality includes:

- Product catalog data with easy navigation
- Product search capability by size, temperature and pressure
- Distributor Locators that point to Industrial and Specialty *Circle of Safety* distributors

Adding industrial hose products and *Circle of Safety* distributors to the app is just the beginning. Parker is already working to develop search capability by media and many other enhancements.

Visit www.hosefinder.com to register and begin using the free, upgraded HoseFinder app. Registered users are not required to re-register or take any action to access the updated app.
