PRODUCT UPDATE

Series 7575 PVC Split Cable Guard *New Sizes and Dimensional Updates*

Series 7575 is a guard/harness to protect cables and hoses from abrasion and debris in underground mining applications. The construction features a smooth tube that prevents snagging and a uniformly split wall for easy installation of cables, hoses and other materials. The translucent, flame resistant PVC material meets MSHA requirements, is abrasion resistant and permits visual observation of the contained cables and hoses.

Series 7575 now incorporates two additional stocked sizes (2" ID and 4" ID), as well as a temperature upgrade to 0°F to 150°F (-17°C to 65°C) for all sizes. All items are scheduled to be in stock by mid-June 2014. Contact Parker for updated pricing.
