Composite Industrial Hose Custom Made Industrial Hose *Engineering Contact and Quotation Information*

Critical inquiries require immediate responses for technical and pricing support. Parker has established a Composite Hose / Custom Made Hose hotline, where our experienced and savvy product development team is available to assist with application recommendations, design expertise and competitive quotations on a nationwide basis every working day.

Custom Made Hose applications are found in almost every industry and typically require features such as special tube and cover compounds or thicknesses, large inside diameters (up to 60" ID), built-in couplings or soft cuff ends. Composite Hose is the perfect choice where the combination of flexibility, light weight and petrochemical compatibility are primary considerations. *Parker is ready to help convert unique opportunities into high-value orders and repeat business.*

Parker is the largest full-service Custom Made Hose supplier in the United States, specializing in the design and fabrication of application-specific hoses and assemblies. Master hose builders use their extensive experience in the art and science of hose design, engineering and materials to seamlessly integrate traditional hand-built hose craftsmanship with computer-controlled production.

Contact Parker to design, fabricate or troubleshoot a Composite Hose or Custom Made Hose solution for you. Please note the consolidated phone number and new hours of operation:
